

Padhee's Tutorial

About The Course

Within a very short span of time India has registered phenomenal growth in producing professionals of international standard. This has been all possible because of continuous drive by different agencies engaged in this field to standardize our examination system. CBSE is one such organization that conducts entrance examination for all NIT's and some reputed and selected Engineering colleges of our country together with engineering colleges of different states including BIT Mesra, Pilani. These Engineering Colleges are considered as the second liner to IIT's. Every engineering aspirant wishes to make it to NIT and for that matter any other reputed engineering colleges whose selection is done through CBSE. The entrance test for such colleges is not that tough. Strategic and methodical preparation under proficient guidance ensures an aspirant to reach the target. The clarity of the student is determined through the examination process, which is different than the usual career examination. The questions of the test carry 60 tough MCQ questions in each subject of Physics Chemistry and Mathematics. These questions have to be answered within two stipulated hours. The most important part of these tests are that the questions are tough and unpredictable. The trend and style of the question take frequent changes and are not confined to any specific book and study materials and also they don't form a verbatim reproduction of text books. The syllabus adopted to test the analytical ability of the student by CBSE has shown that the +2 Science students of CHSE, Orissa face difficulties in adopting themselves to the syllabus. Preparation like mechanical memorization of the text in no way helps an aspirant to secure desired rank in the test. An aspirant to reach his dream destination has to under go a special type of orientation so as to develop his/her creative ability, conceptual clarity, thinking process and definite planning. Besides all these an aspirant has to have hard practice & professional guidance to make sure of his success. Selection of books, study materials, core group of teachers and above all a coaching centre play a pivotal role in his attempt to get through this tough test with a spectacular performance.

The programme at PTPL and teaching methodology by ex-IIT'ans drawn from across the country is the best in the state. They leave no stone unturned to orient and shape the young minds to produce the best result. The mindset of the aspirant is made dynamic and vibrant to face all toughness with easy.

The comprehensive AIEEE has been specially designed and has been shaped for the +2 science/class XII appeared or already passed in such a manner that makes them work by themselves. The entire course is monitored through study materials and assignments under the able guidance of the ex-IIT'ans for step by step development of the aspirant and this process ensures them higher level of mental exercise. Every test conducted at home for these aspirants are seriously attended to and evaluation and analysis are done zealously, so that nothing is left to chance. Weekly Assessment Test (WAT), Monthly Assignment Test (MAT) never allows a student to be casual in his preparation as the result comes out just after the test. A student is thoroughly assessed so as to be identified his/her strength and weakness and he/she is persuaded to overcome their weakness through continuous counseling. The evaluation through OMR Technique and analysis and doubt clearing classes that follows give that tests a student an opportunity to understand himself and helps at them to plan their preparation not to lag behind.

The target test series which consists of 15 tests in each subject is conducted in the midway of the course and AIEEE rehearsal conducted at the end of the course

sharpens the skill and mind of the aspirant. It also provides him/her a good platform for practice for the actual test. The doubt clearing and counseling sessions and the daily test conducted in every class never allows any doubts or confusion to stay in. The monthly performance report of the aspirant is sent to his parents every month after the monthly test and this report contains all informations regarding the progress of the student and the draw back. This keeps the parents updated regarding their ward and ultimately it makes their ward more serious in his preparation and never skips any class or test. This course has been planned keeping an eye on the other state level entrance examination as a result a learner is equipped thoroughly for AIEEE and other state level entrance examinations including OJEE (E&M).

Padhee's Tutorial Pvt. Ltd., which has established itself for its commitment never compromises with quality of teaching and coaching. It has the state of the art Institution with air-conditioned classrooms fitted with LCD projectors, a well developed library reach with titles with latest publications a battery of well-versed faculties and ex-IIT'ans.

the entire course programme is monitored in three cycles:

Cycle-1 begins with detailed studies of the course, conceptual clarity and continuous counseling that removes the doubts and confusion of the students. **Cycle-2** is devoted to advance level studies, Tutorials and doubt clearing sessions. This is also considered as reversionary cycle, which gears up and freshens the knowledge of the student that he has gathered over the months. Strategy for AIEEE ensures him more practice. More counseling and doubt clearing sessions and tutorials are some of the aspects, which make his preparation full proof. **Cycle-3** is conducted just a month ahead of his actual test is full of practices with examination hall temperament to wade out his nervousness. The benefit can be well visualized from the performance of the student of the last three batches of PTPL centers. There has been stiff rise in the result index, which has arisen from 302 qualifier during 2003 to in 2007 which comprises four students in Toppers list including the Topper. The entire programme is monitored through the ex-IIT'ans.

CYCLE - 1

Commencing from June, July to Dec.

- ◆ Detailed study of logics as per syllabus of AIEEE taught by ex-IIT'ans and versatile experienced teachers.
- ◆ Daily Test by the faculties in every class.
- ◆ Daily counseling & doubt clearing session.
- ◆ WAT as per the pattern of AIEEE.
- ◆ MAT as per the pattern of OJEE on cumulative syllabus.
- ◆ Five books are supplied as study material in each subject.
- ◆ Basic assignment (15 in each subject).
 - ◆ 5 days in week is meant for regular classes. 4.5 hours of duration of classes in each day and one day is for test. In total 6 days per week.

CYCLE - 2

Commencing from January to March

- ◆ Revisionary classes of the entire syllabus.
- ◆ Advance level classes to generate problem solving skill by ex-IIT'ans.
- ◆ Increased number of doubt removal session, council session and Tutorials.
 - ◆ Weekly Assignment test for AIEEE
 - ◆ MAT for JEE.
 - ◆ "Target to AIEEE" test series. With its analysis class.
 - ◆ Assignment practice.

CYCLE - 3

Commencing from June to Dec.

- ◆ The practice & reversion of entire syllabus through Test series & Analysis class.
- ◆ Balance Test of "Target to AIEEE" Test Series.
- ◆ AIEEE rehearsal.
- ◆ VST for OJEE (E&M).
- ◆ Test analysis class.
 - ◆ Increased number of doubt removal session & tutorials.
